Forecast for Saturday 09 Nov 2024

Weather: Dry, apart for perhaps a little drizzle. Remaining predominantly cloudy, with widespread hill fog, although there is a small chance of some sunny then clear spells developing across the northwest of the Park. There is also a small chance of highest summits above 900m becoming sunny or clear above the cloud inversion.

Chance of cloud-free hill tops above 800m: Generally zero, but 20% in the northwest this afternoon and also above 900m.

Low Cloud and visibility: Extensive low cloud between 400m and 800m, making navigation difficult. Patchier cloud cover above 900m with highest summits possibly in clear or sunny conditions throughout. Hazy at low levels.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Remaining predominantly cloudy but with a small chance of the highest tops being in clear conditions, above a cloud inversion.

Forecast for Sunday 10 Nov 2024

Weather: Any cloud breaks will soon fill, leaving a cloudy night with a chance of patchy drizzle arriving. Then overcast and misty through the morning with outbreaks of rain or drizzle, these mainly light. Through the afternoon the light rain gradually becomes persistent. Then becoming dry and largely clear from the west, late evening.

Maximum wind: South or Southwest 20-25mph, becoming northwest in the evening.

Chance of cloud-free hill tops above 800m: Less than 10%, becoming 90% late evening.

Low Cloud and visibility: Extensive cloud and fog above 400m or 500m creating difficult navigation conditions. Occasionally poor visibility in rain or drizzle. Cloud clearing during the evening.

Temperature: **Valleys:** Plus 6C rising to 12 or 13C.
At 800m: Plus 7 to 9C.
Freezing level: Above summits.
